The image shows a Kanban board with five columns: Open, story, To Do, Doing, and Closed. Each column contains task cards with titles, tags, and IDs.

Column	Task Title	Tags	ID
Open (13)	Afficher numéro version	affichage	#48
	Auto migrate at startup	enhancement	#15
	Import Démo	import	#47
	Restricted access rename	authentification, enhancement	#55
	Constraint on corpora name	enhancement	#56
	Increase time limit	configuration	#57
story (4)	Recherche		#19
	Transfert des données		#18
	Traitements sur les données		#25
	Importer d'anciennes données		#30
To Do (0)			
Doing (0)			
Closed (48)	Nom fichier wav & trs	bug	#51
	Displays statistics	affichage, base de données, fonctionnalité, model	#58
	rename corpus	administration, fonctionnalité	#54
	Rename corpora	fonctionnalité	#53
	Déployer 1.2.0 en production	deploiement	#50
	Installer sox ou ffmpeg dans docker pour calculer la durée en secondes du fichier média	outils externes	#35

Pipeline triggers

Collapse

Triggers can force a specific branch or tag to get rebuilt with an API call. These tokens will impersonate their associated user including their access to projects and their project permissions.

Manage your project's triggers

Description

Add trigger

No triggers have been created yet. Add one using the form above.

In the following examples, you can see the exact API call you need to make in order to rebuild a specific `ref` (branch or tag) with a trigger token.

All you need to do is replace the `TOKEN` and `REF_NAME` with the trigger token and the branch or tag name respectively.

Use cURL

Copy one of the tokens above, set your branch or tag name, and that reference will be rebuilt.

```
curl -X POST \  
  -F token=TOKEN \  
  -F ref=REF_NAME \  
  https://git.atilf.fr/api/v4/projects/19/trigger/pipeline
```

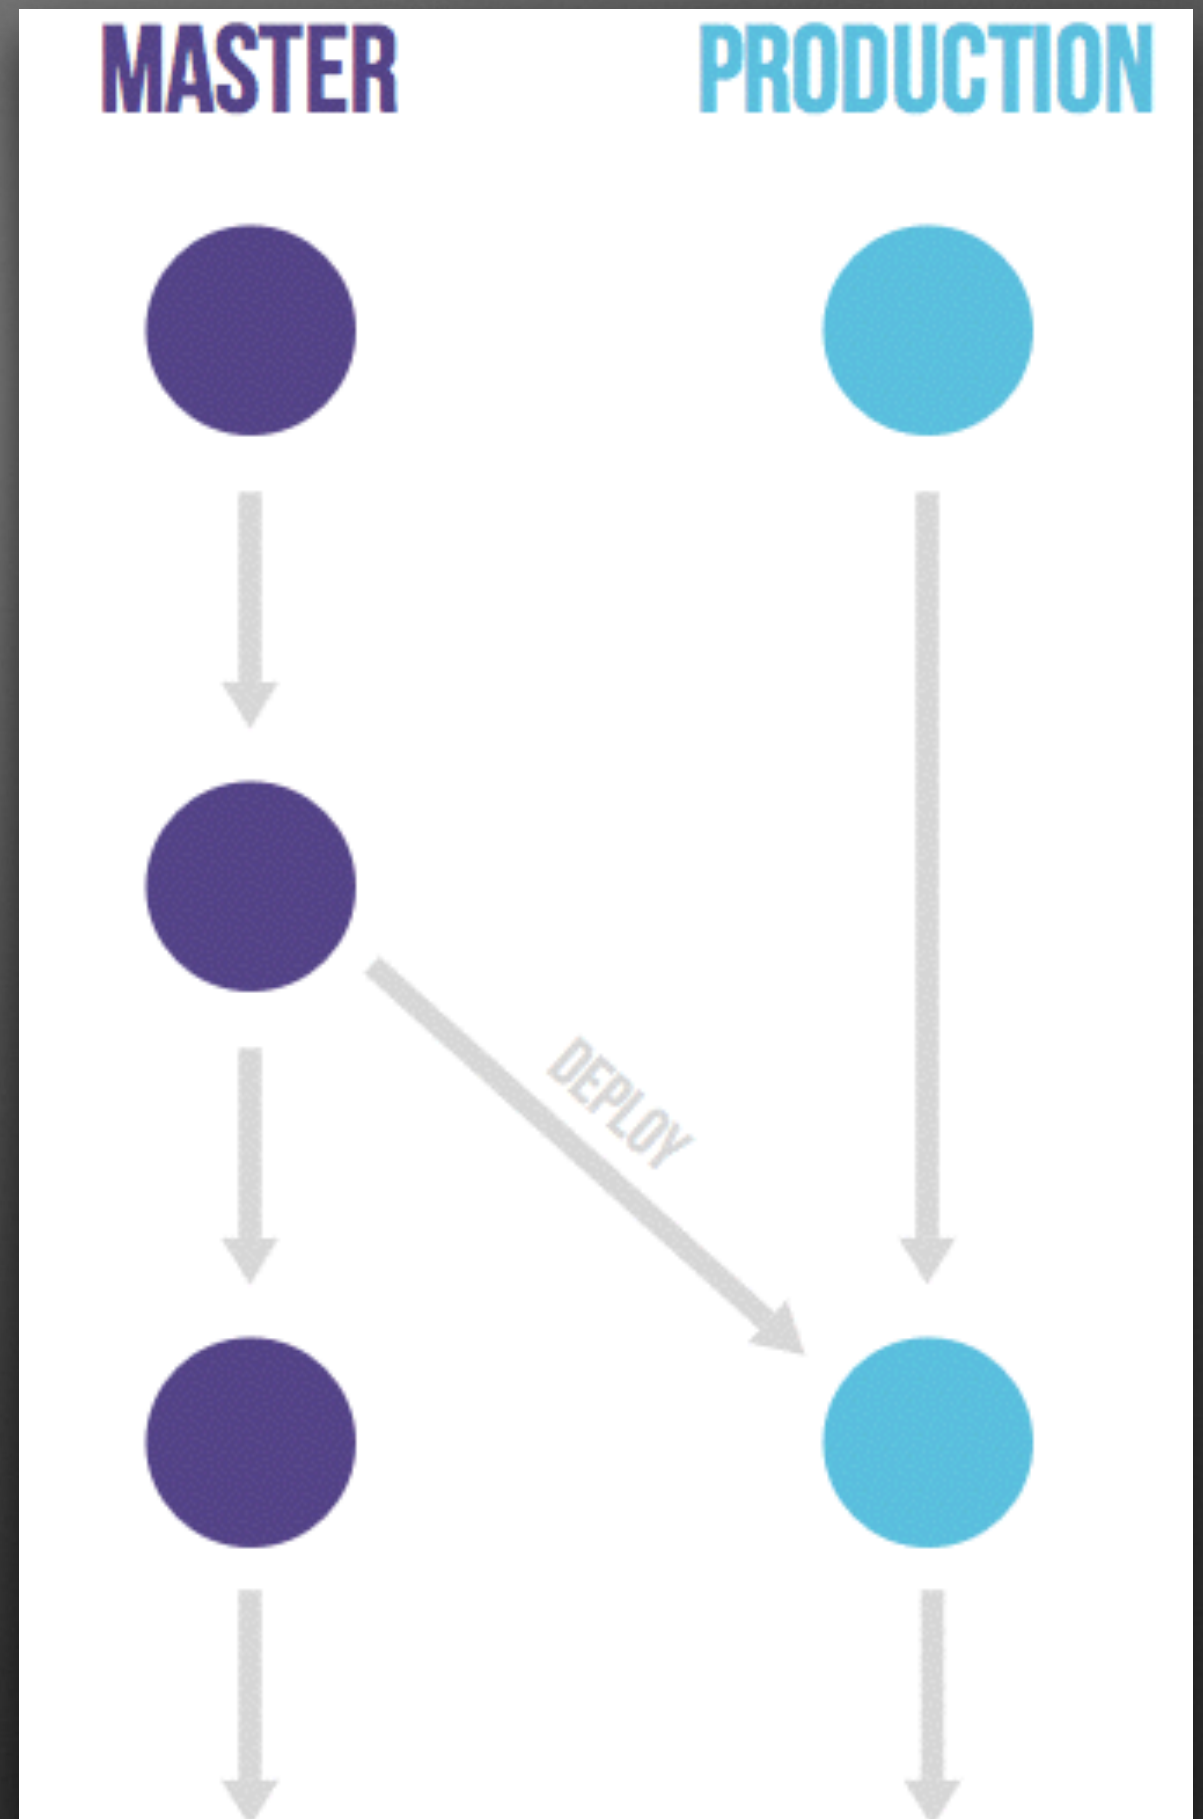

Use .gitlab-ci.yml

In the `.gitlab-ci.yml` of another project, include the following snippet. The project will be rebuilt at the end of the pipeline.

```
trigger_build:  
  stage: deploy  
  script:  
    - "curl -X POST -F token=TOKEN -F ref=REF_NAME https://git.atilf.fr/api/v4/projects/19/trigger/pi
```
